

GRIFFIN LEBLANC

Full Stack Software Engineer

Ottawa, ON | (613) 869-5116 | griffin.leblanc@gmail.com | [linkedin.com/in/griffinleblanc](https://www.linkedin.com/in/griffinleblanc) | griffinleblanc.ca

SUMMARY

Full Stack Software Engineer with 2+ years of production fintech experience building React, TypeScript, Node.js, and MongoDB systems across regulatory logic, internal tooling, QA automation, and rollout workflows. Brings a product-minded engineering approach shaped by production troubleshooting, technical implementation, AI-assisted development, and cross-functional work across operations, compliance, QA, and support.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, component architecture

Backend: Node.js, REST APIs, MongoDB, transactional email, authentication, role-based access control

Cloud / Platform: AWS, Docker, Vercel, Resend, Git, npm

Testing / QA: Playwright, Vitest, BTM simulators, QA automation, integration testing

Product / Operations: Jira, Amplitude, production troubleshooting, incident response, rollout workflows, LLM-assisted debugging

EXPERIENCE

Full Stack Software Engineer | Bitcoin Depot

June 2024 - Present

Remote, Ottawa, ON

- Build and support production fintech systems for a 9,000+ machine network processing millions in daily transaction volume and serving thousands of customers per day.
- Own mission-critical pricing and fee logic, eliminating routine manual configuration for rollout and relocation workflows through scripts, backend integrations, and internal frontend tooling.
- Build and maintain state-based regulatory UI logic using json-rules-engine, adapting customer experiences across highly regulated jurisdictions.
- Helped lead Cash On-Ramp feature development, enabling customers to deposit cash into an app balance and buy Bitcoin asynchronously beyond point-of-sale kiosk purchases.
- Build and ship full-stack features across React, Next.js, TypeScript, Node.js, MongoDB, AWS, Docker, and internal fintech systems.
- Serve as a go-to technical troubleshooter for production escalations, rollout incidents, and cross-functional incident investigations.
- Improved QA throughput by enabling remote BTM simulator testing, saving QA roughly 20 minutes per hour compared with physical hardware testing workflows.

Senior Technical Account Manager / Implementation Specialist | Bitaccess, acquired by Bitcoin Depot

Jul 2021 - June 2024

Remote, Ottawa, ON

- Led onboarding and transition operations for 9,000+ Bitcoin ATMs during the acquisition, coordinating machine records, organization setup, hot wallet creation, rollout readiness, and stakeholder communication.
- Served as lead operator for company and regional rollouts across Canada, Australia, Hong Kong, Brazil, and Mexico, implementing required UI changes and coordinating technical readiness.
- Translated field issues, compliance needs, and customer-impacting incidents into technical requirements for engineering and operations teams.
- Supported deployment troubleshooting, production escalations, and regulated fintech operations across technical account, support, compliance, and engineering workflows.

PROJECTS

Faceout | Founder / Developer | Next.js, React, TypeScript, Tailwind, Vercel, Resend, Vitest

- Founded and built a web studio platform for local-business websites, SEO, and Google Business Profile management.
- Build production websites using Next.js, TypeScript, Tailwind, Vercel, Resend, and Vitest, with reusable components shared across client projects.

PermiPro | Founding Engineer | Municipal permit SaaS

- Built core SaaS infrastructure for a municipal permit platform, including authentication, account settings, role-based permissions, transactional email, multi-step forms, document intake, and workflow automation for permit applications.

EDUCATION

Bachelor of Commerce, Finance | Dalhousie University

2020
